Brainstorm

Input: 2 inspiration session Futures Literacy to think about the learningspace of the future

Result: Sketches of the classroom of the future to discuss

Participants: several teachers of different studies

CC BY

Results

Active learning space

1. Offers opportunities to learn individual or in common;
2. Activates students to work on the assignments;
3. Stimulates interaction between teacher and student.

CC BY

Offers opportunities to learn individual or in common

Space supports communication between student and teacher

Student can easily move in the classroom

Space needs to be inviting for different educational styles

CC BY

Activates students to work on the assignments

Classroom is inviting, inspiring and activating

Facilities challange the students to get started actively

CC BY

Stimulates interaction between teacher and student

Flexible furniture to use for different learning styles

Supports hybrid education

CC BY

Examples of activities that can take place in this classroom

- Interactive tutorials
- Coaching
- Presentations (external client)
- Game education
- Honours education
- Design Thinking
- Intervisions

Design

After discussing the sketch with the project group of teachers the most important arguments are incorporated. The most important feedback:

+ Modern furniture (e.g. flexible whitebord)

+ Mobile furniture to use the space in a flexible way

- The number of students (+/- 18) was not enough. The number of square meters was too low. Therefore we changed the classroom to a bigger one to use the classroom with max. 32 students.
- The teachers would like to have more furniture that activates. We added tables to stand at and whitebords to stimulate active learning.
