Q&A

# Open Science Infrastructure

**This call focuses on the development of digital infrastructures that support open science practices. It covers the entire spectrum of open science and is deliberately broad in scope to be inclusive of the community's diverse digital infrastructure needs.**

What to apply for

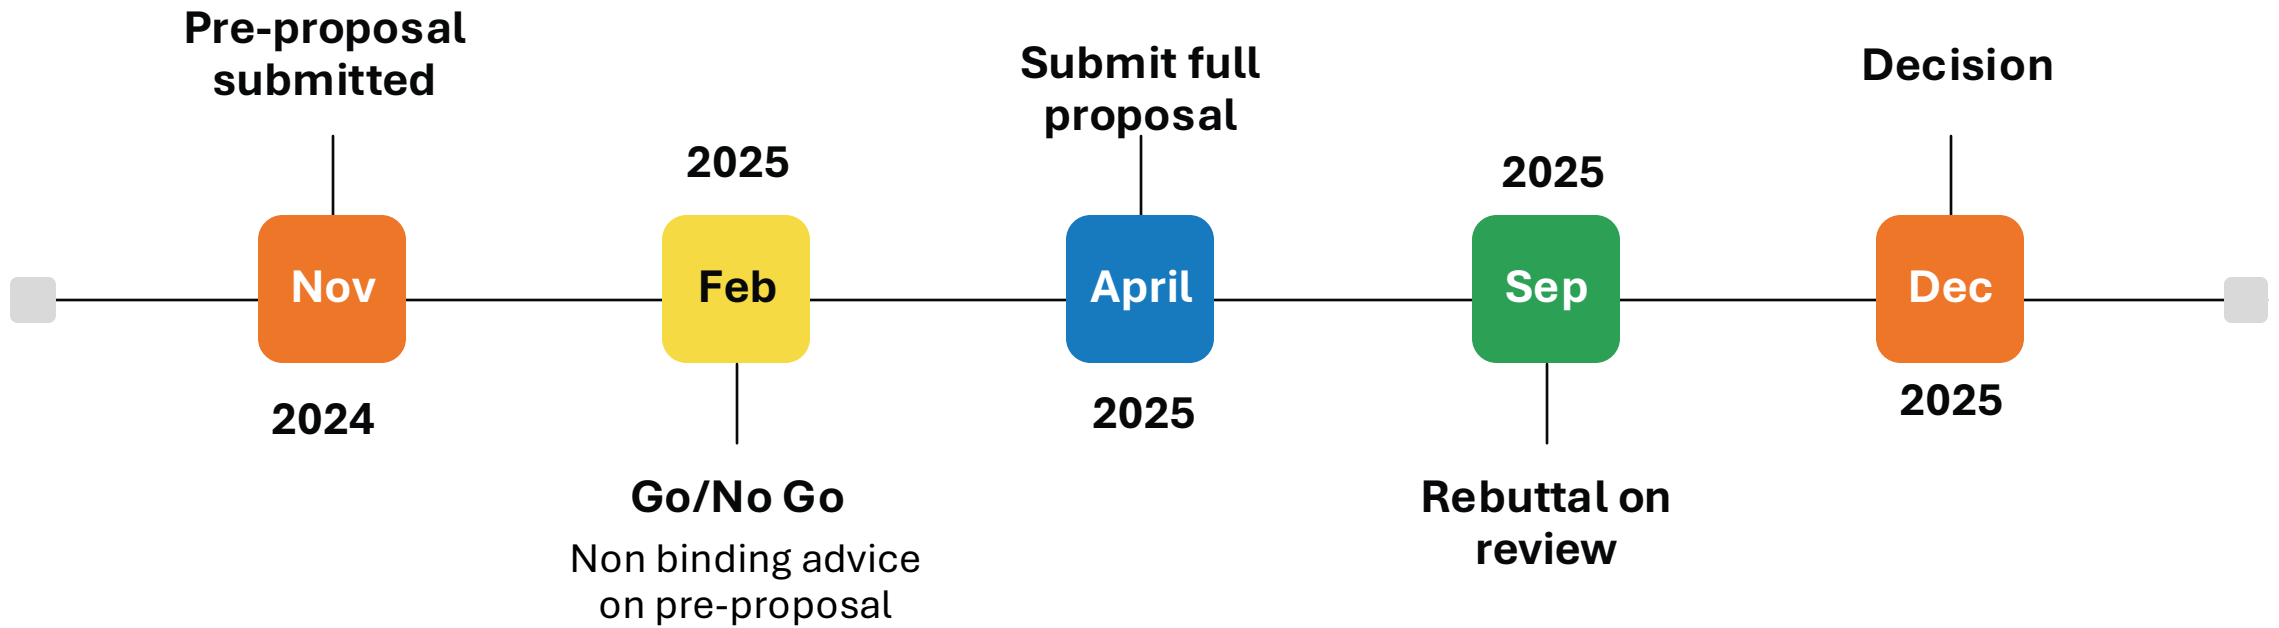

—

Within this programme there are two types of applications:

- Application type 1: small projects for improvements and/or extensions of existing infrastructure, or pilots for setting up new infrastructure. Maximum funding of € 250,000 and maximum project duration 2 years;
- Application type 2: large projects for improvements and/or extensions of existing infrastructure. Minimum funding of € 250,000 and maximum funding € 1,500,000 and maximum project duration of 4 years.

The application must provide a detailed substantiation of all the costs for which funding is being requested. An outline of the different types of costs and an overview of eligible and ineligible costs for funding are given in section 7.1 of the Call for proposals.

# Timeline

# | Endorsement

- Chiefs Open Science advice – Endorsement by rectors

"This pre-proposal is submitted on behalf of **all** universities and is unanimously endorsed by **all rectors**. It is seen as important for all Dutch knowledge institutions, fully in line with previously established national ambitions. In addition, the proposal is crucial as part of a national infrastructure to make Open Science widely and quickly applicable."

# | Current participants

## **DURF**

VU (Main), SURF, WUR, TUDelft, ULeiden, KB, DANS

## **BROCCOLI**

SURF (Main), ULeiden, VU, EUR, WUR, TUDelft

# | DURF

SURF

## DUtch Repository Federation

Federated network of Dutch repositories and (C)RIS's

### Objectives

- Promote digital sovereignty by long-term preservation
- Improve efficiency by optimizing and integrating existing components
- Strengthen trust in open metadata for better reuse and reporting
- Enhance discoverability and accessibility of Dutch research

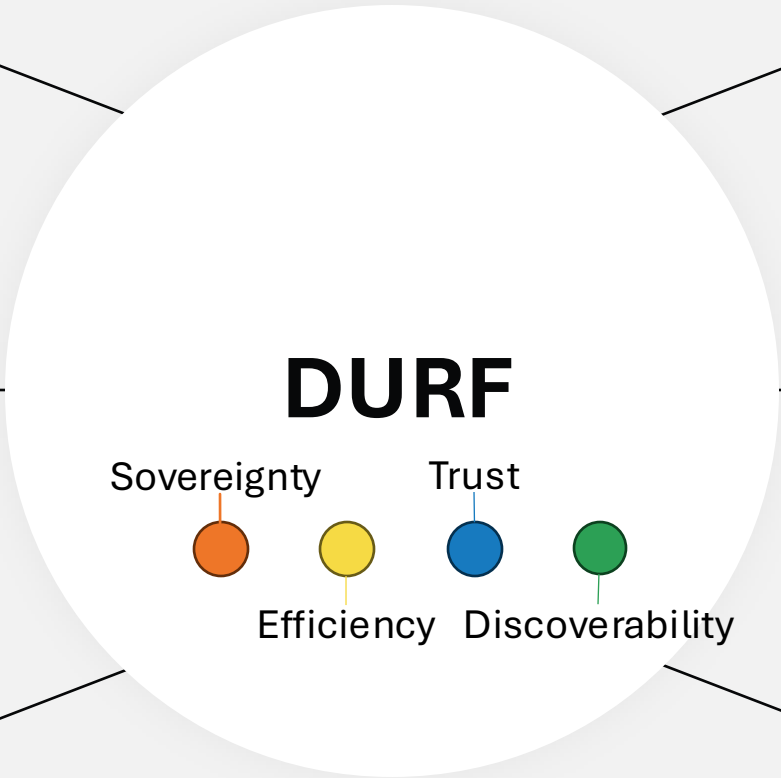

**Theme 1:**  
Governance and  
Stewardship of the  
Shared Information  
Chain

**Theme 2:**  
Metadata Quality  
Improvement

**Theme 3:**  
Stimulate uptake of  
full text

**Theme 4:**  
KB eDepot Archiving  
and URN Resolution  
via OpenAIRE

**Theme 5:**  
Distribution &  
Discovery Optimization

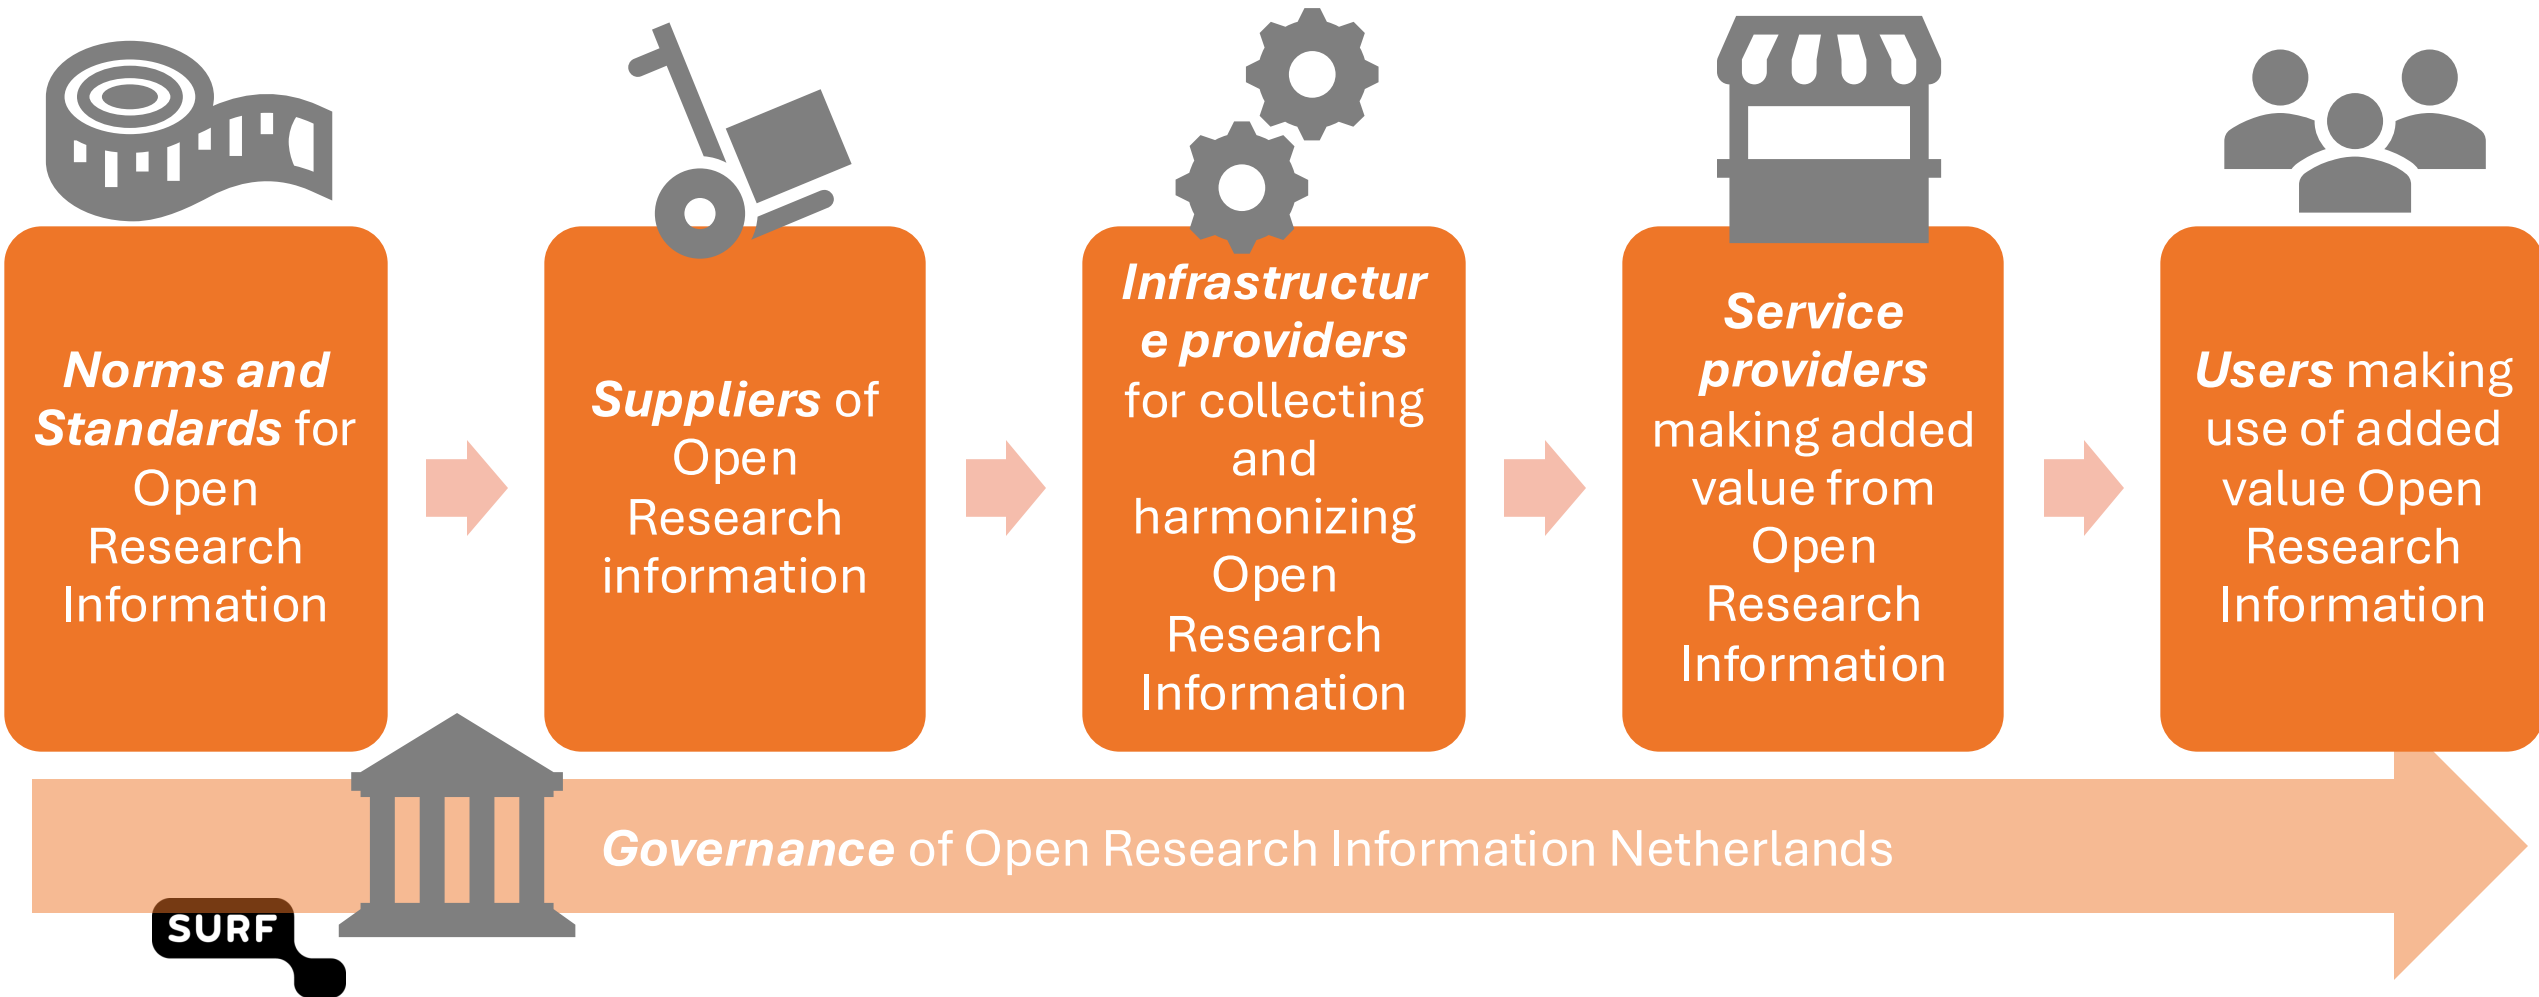

**Theme 6:**  
Portal Development  
and Enhancement

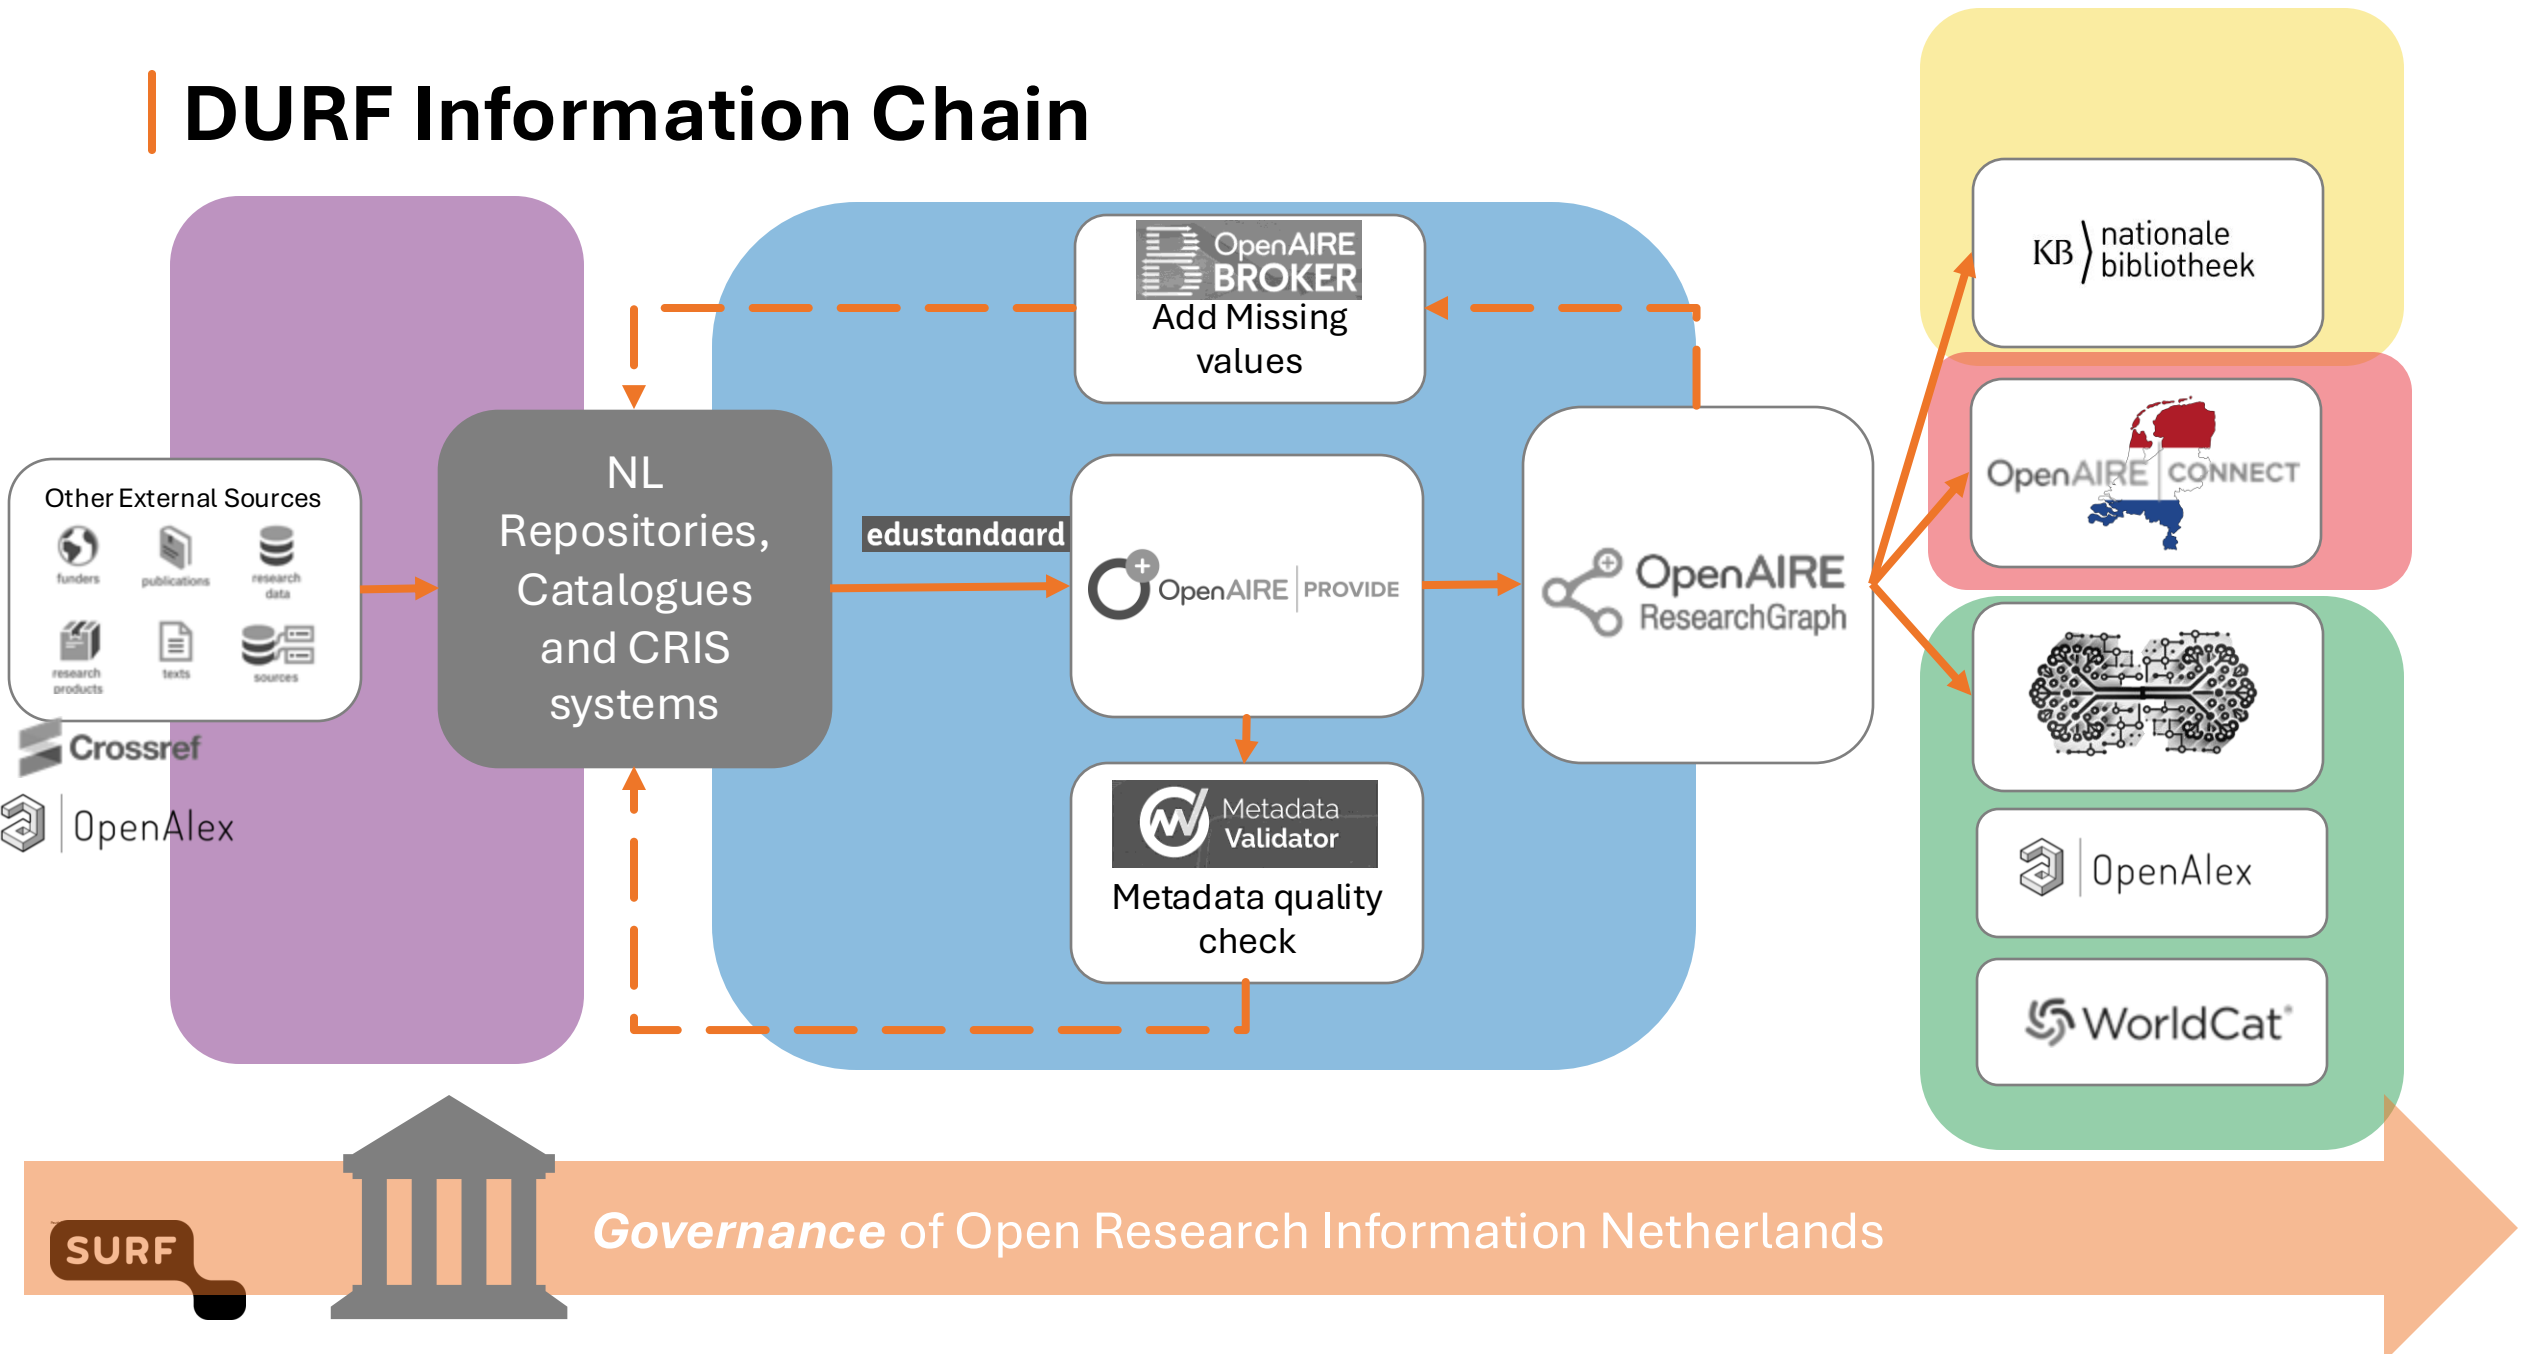

# | Research Information | Value Chain

# DURF Information Chain

# | Team composition

## Theme coordinators:

- Theme 1 : Alastair Dunning (TU Delft),
- Theme 2&5 : Rutger de Jong (Leiden University),
- Theme 3 : Cristina Huidiu (WUR),
- Theme 4 : Simone Kortekaas (KB National Library),
- Theme 6 : Naomi Wahls–van Gils (TU Delft)

## Project support:

- Project lead: Maurice Vanderfeesten (VU/SURF),
- Project assistant: tbd (tbd);
- Information Architect: tbd (SURF);
- Legal advisor: tbd (SURF);
- Community/Communication advisor: tbd (SURF);

# | Equally Sharing the Budget?

- 57 Dutch Research Performing Organisations (14 uni's, 7 UMC's, 36 UAS's)
- € 1.5M / 57rpo's = € 26.000 per RPO
- 26.000 / 4years = **€ 6.500 per year per RPO**

# Budget

Type of costs	Short explanation	Costs
<b>Personnel costs</b>	Project Lead (1,6FTE, scale 12, over 4 years.)	€ 187.200
	Project Assistant (0,8FTE, scale 10, over 4 years.)	€ 94.720
	Information Architect (1FTE, scale 12, over 2 years.)	€ 149.200
	Legal Advisor (0,2FTE, scale 12, over 2 years.)	€ 29.840
	6 Thematic coordinators (0,8FTE, scale 11, over 4 years.)	€ 484.800
	Communication / Community advisor (0,8FTE, scale 11, over 4 years.)	€ 108.160
	<i>Subtotal (78% of request budget)</i>	€ 1.053.920
<b>Other costs</b>	Training, Catering, Facilitation	€ 10.000
	Communication materials	€ 15.000
	Engagement/Stimulation budget Theme 1	€ 50.000
	Engagement/Stimulation budget Theme 2	€ 50.000
	Engagement/Stimulation budget Theme 3	€ 25.000
	Engagement/Stimulation budget Theme 4	€ 25.000
	Engagement/Stimulation budget Theme 5	€ 25.000
	Engagement/Stimulation budget Theme 6	€ 25.000
	External Hire eg. open source developer (for o.a. validator, portal features, etc.)	€ 100.000
	<i>Subtotal (22% of request budget)</i>	€ 325.000
<b>Total request from NWO</b>		<b>€ 1.378.920</b>
<b>Non-eligible costs</b>	OpenAIRE licenses	€ 60.000
<b>In kind costs</b>	by SURF, total amount (extra overhead):	€ 111.440
	by institutions – to be estimated.	

# | BROCCOLI

SURF

## BROCCOLI

A Dutch hub for healthy research information

### Objectives

- increasing efficiency and (meta)data quality through:
  - shared open data products
  - collaborative data engineering
  - pooling of resources and expertise

# | Project plan

## **WP 1: ORI User community**

Building and managing an engaged user community of data users and providers

## **WP3: Technology platform**

Build a robust, integrated technical architecture leveraging existing platforms and tools

## **WP2: Data curation and governance**

Data governance, quality control and enrichment through rules of participation, curation teams, and enrichment service

## **WP4: Project/product management**

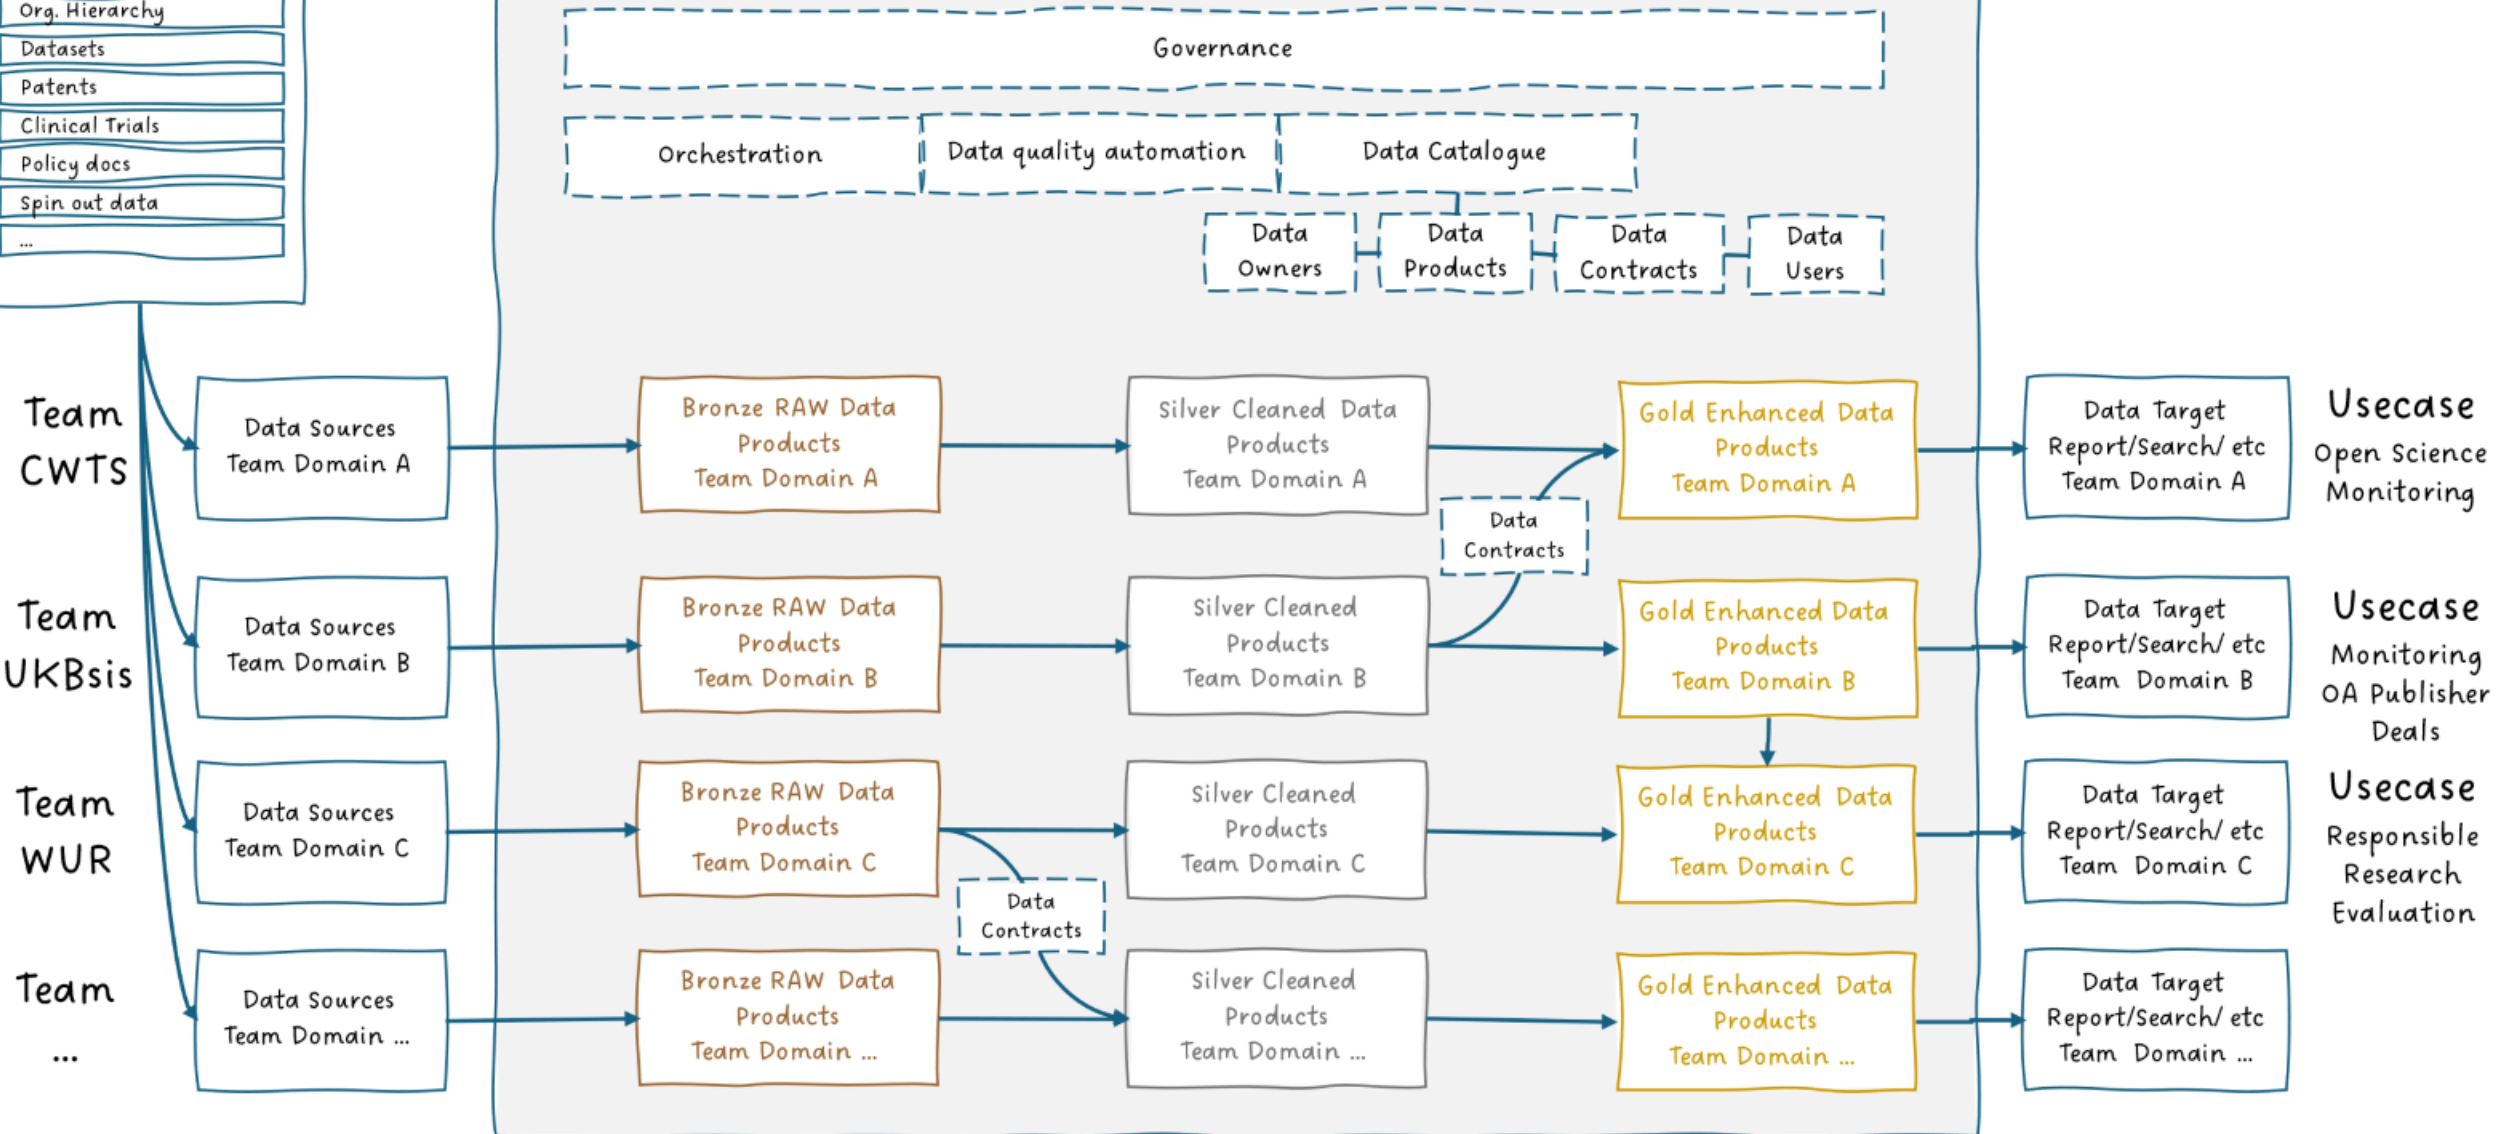

Governance plan, development roadmap, sustainability and business model

## Data Domains

- Funding Opportunities
- Funded grants - ext
- Publications
- Org. Hierarchy
- Datasets
- Patents
- Clinical Trials
- Policy docs
- Spin out data
- ...

# Medallion Data Mesh Architecture for: NL Open Research Information Hub

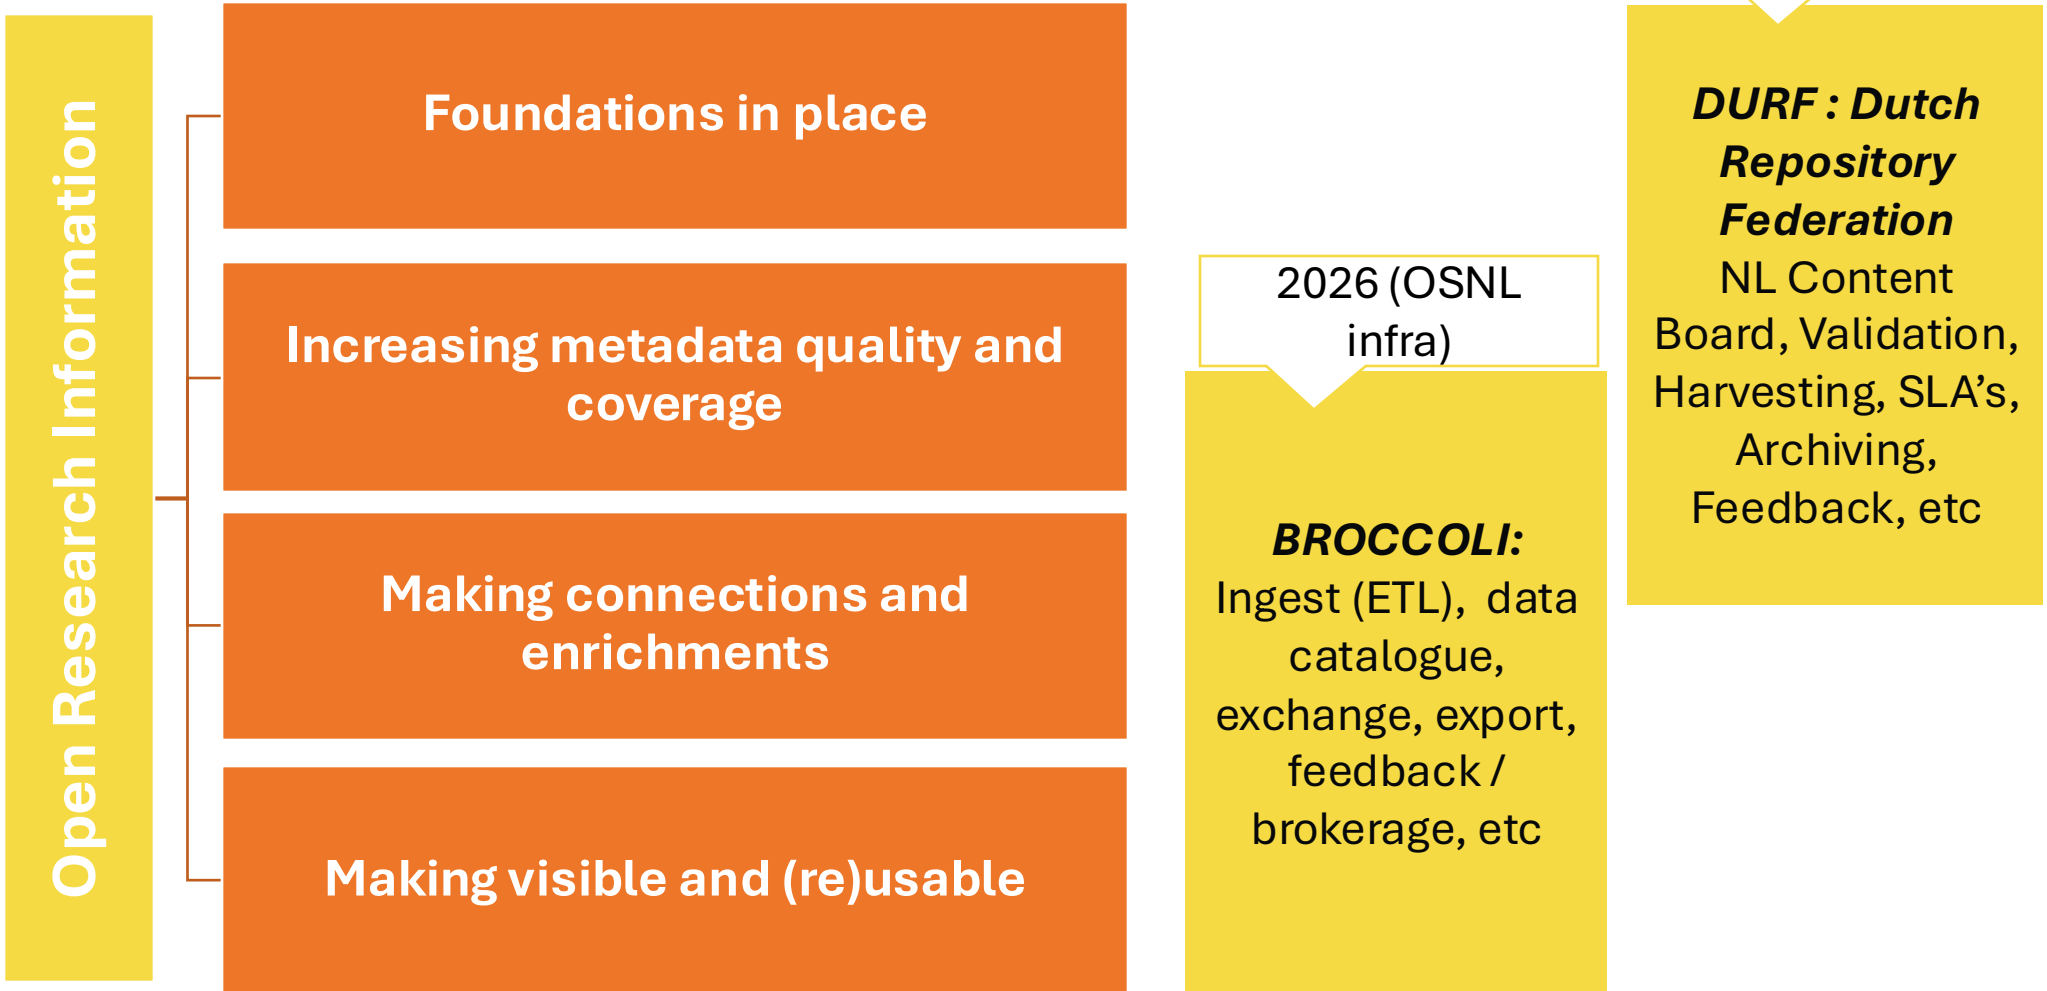

# | Team composition

- **WP1: ORI User Communities** Tung Tung Chan (EUR strategy advisor, board member RINN, Coordinating WP1), Thed van Leeuwen (CWTS; Coordinating responsible evaluation and OS monitoring), Arjan Schalken (UKB, Coordinating monitoring publisher deals), Maaïke Koperdraad (UKB, user experience dashboards)
- **WP2: Data Governance and Curation**; Arjan Schalken (UKB; Coordinating data governance), Nees Jan van Eck (CWTS; Coordinating data orchestration and curation), Maaïke Koperdraad (UKB, data quality), Martijn Visser (CWTS, data engineering)
- **WP3: Technology Platform**; Menno Grijpma (SURF; Tech Consultant), Cristina Huidiu (WUR; Product manager), Maarten Hoogerwerf (SURF; Architect), Bram van den Boomen (CWTS, DevOps)
- **WP4: Project/Product Management**; John Doove / Eileen Waegemaekers / Maurice Vanderfeesten (SURF; Project lead), Naomi Wahls-van Gils (TU Delft; Governance plan).

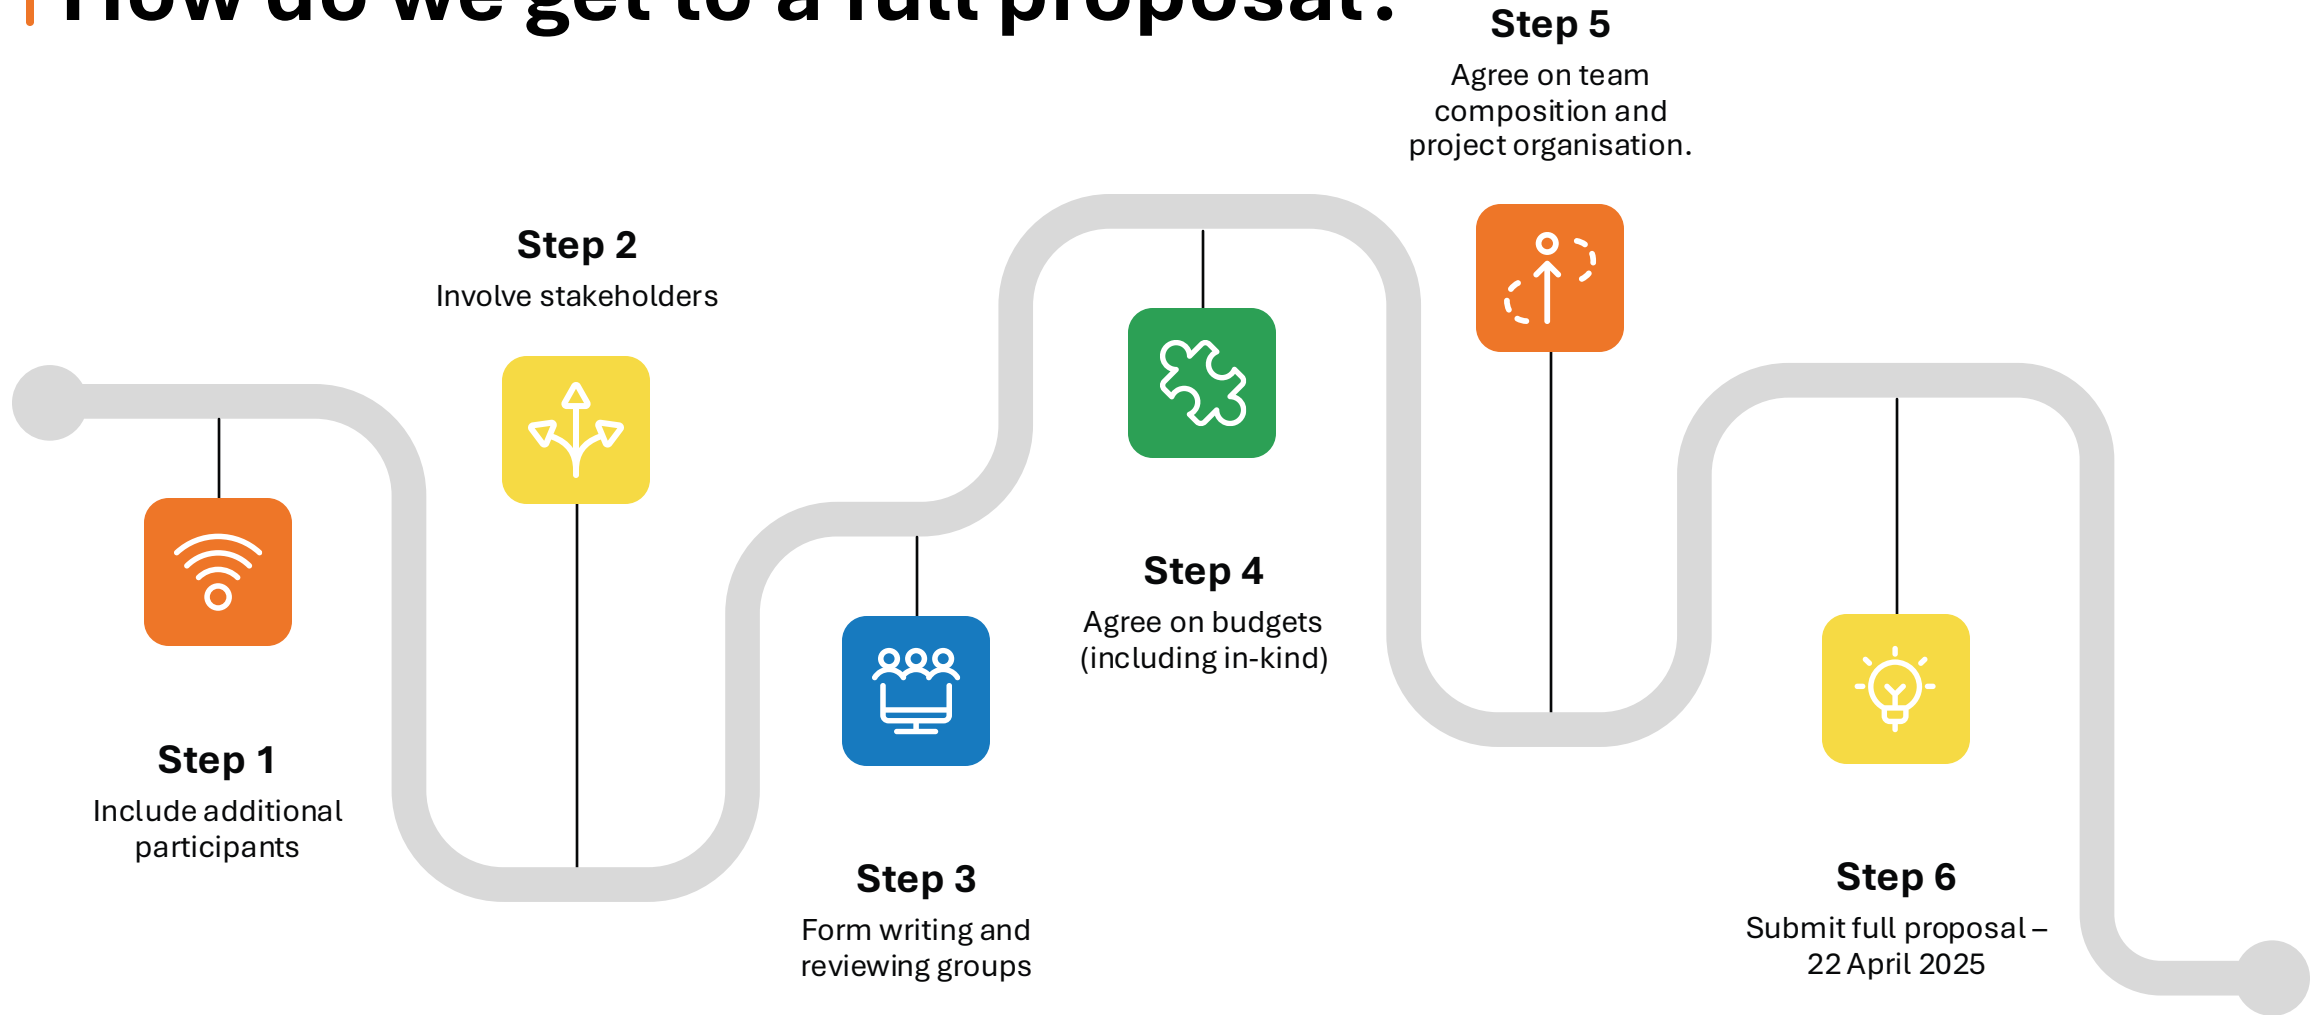

# Budget

Type of costs	Short explanation	Costs
Personnel costs	WP1: Community Coordinator (0,8FTE, scale 12, over 4 years)	€ 101.100
	WP1: Usecase expert responsible research evaluation & open science monitoring (0,4FTE, scale 12, over 4 years)	€ 54.300
	WP1: Usecase expert publisher deals monitoring (0,4FTE, scale 12, over 4 years)	€ 54.300
	WP1: UX expert (0,8FTE, scale 11, over 4 years)	€ 88.300
	WP2: Data governance coordinator (0,8FTE, scale 12, over 4 years)	€ 101.100
	WP2: Data orchestration & curation coordinator (0,8FTE, scale 12, over 4 years)	€ 101.100
	WP2: Data quality curator (2FTE, scale 10, over 4 years)	€ 183.500
	WP2: Data engineer (2FTE, scale 10, over 4 years)	€ 183.500
	WP3: Product manager (0,8FTE, scale 12, over 4 years)	€ 101.100
	WP3: Dev/Ops (2FTE, scale 12, over 4 years)	€ 241.500
		<i>Subtotal (81% of request budget)</i>
Other costs	IT costs (Cloud storage, licenses)	€ 170.000
	Training, Catering, Facilitation	€ 10.000
	Communication materials	€ 15.000
	External hire (eg. UX, Consultancy)	€ 95.000
	<i>Subtotal (19% of request budget)</i>	<i>€ 290.000</i>
<b>Total request from NWO</b>		<b>€ 1.499.800</b>
