Inspanningsregulatie
Inspanning & Tijdsinvesteering

Hoe hebben studenten zich aangepast aan
'emergency remote education'?

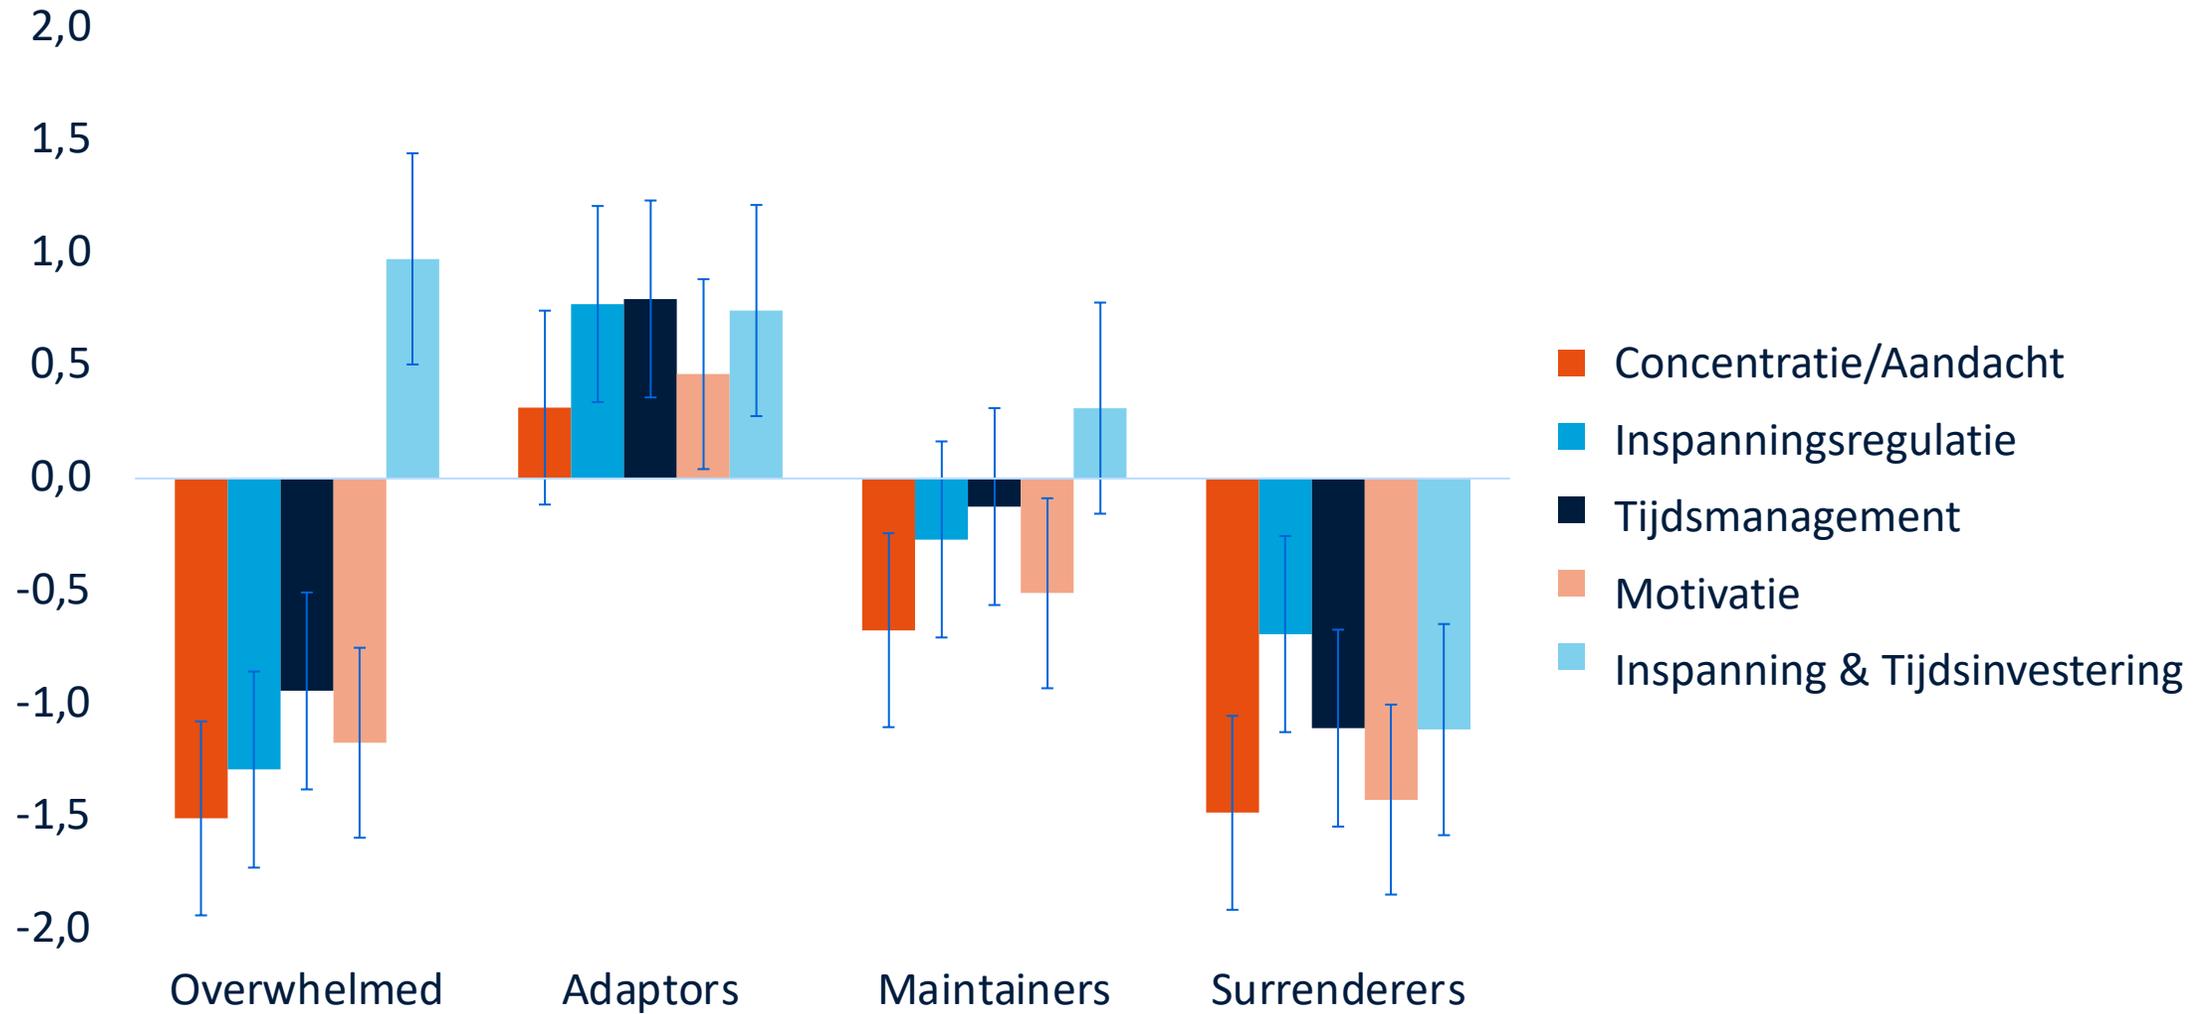

Verandering in resource management strategieën

k-means clusteranalyse – 4 typen studenten

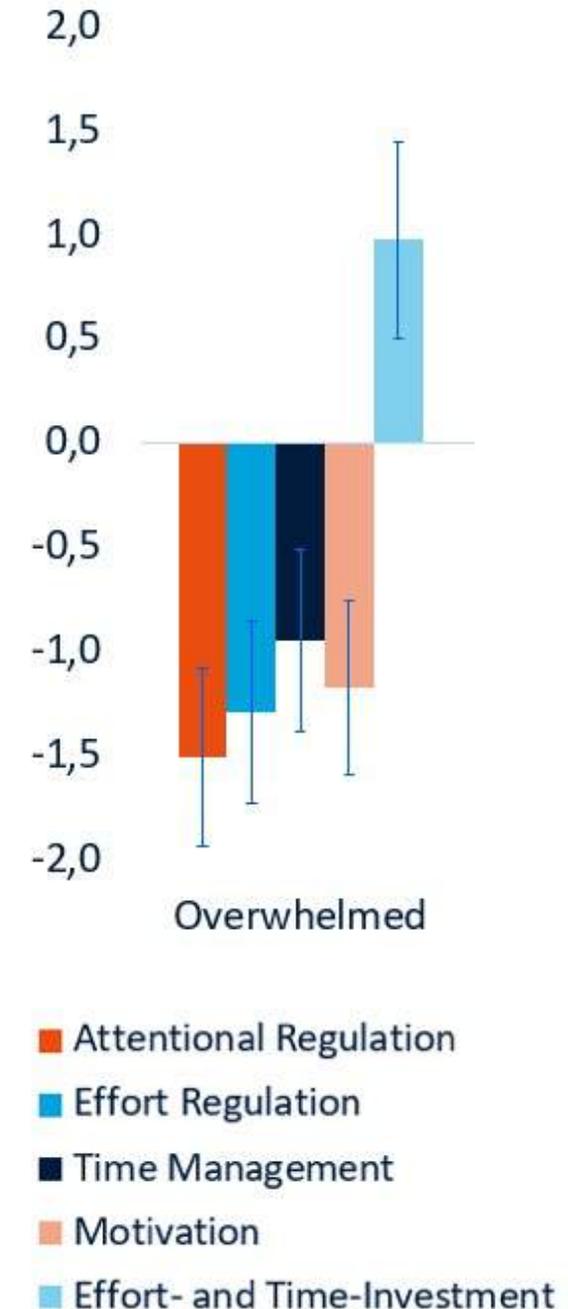

4 typen studenten

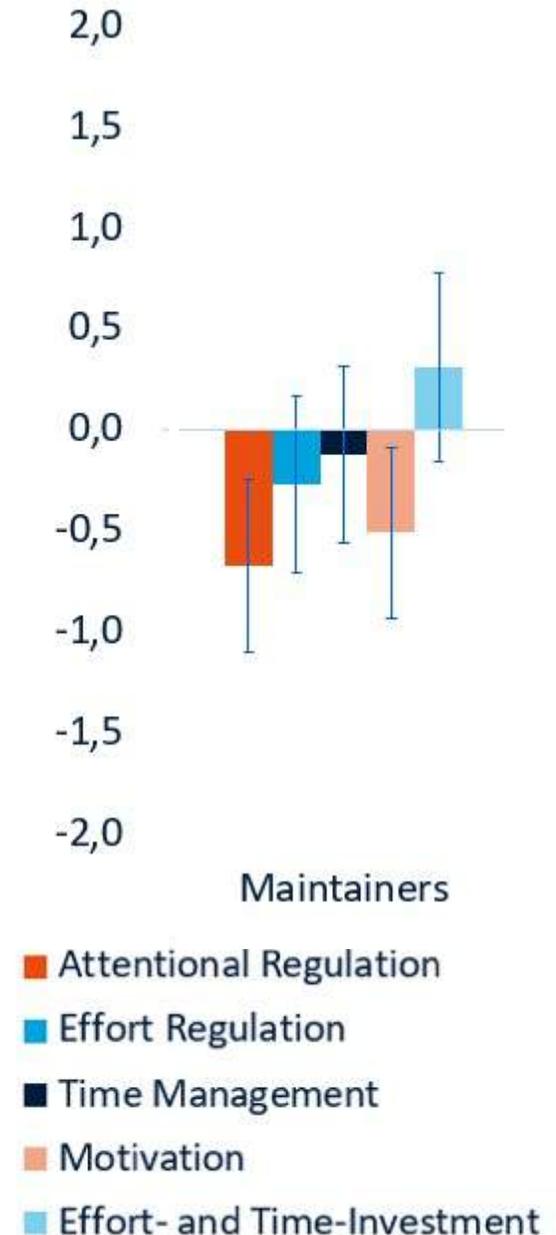

The overwhelmed

*We don't have proper schedules anymore. I guess some students have been able to adapt easily, but in my case, [...] it's as if there was no sense of being able to **take breaks** anymore. Lectures are becoming much longer than 2hs with the new materials given, and overall, I feel as if the **study-load has increased**.*

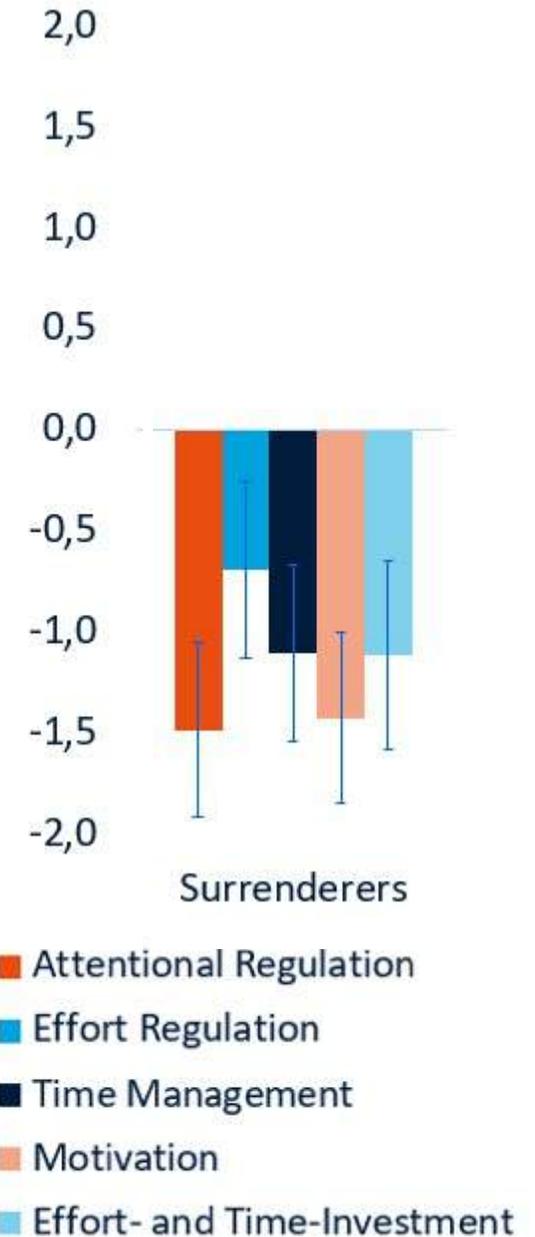

The Maintainers

*That you are no longer in this direct academic environment. Normally I would go to the library before or after and I really need that because it has always been **difficult to concentrate at home** best. Of course you are online with everyone you would be in a tutorial with and while that **can also have benefits** because you can do it **comfortably** from your home, it also **took away** some **motivation** from me for sure.*

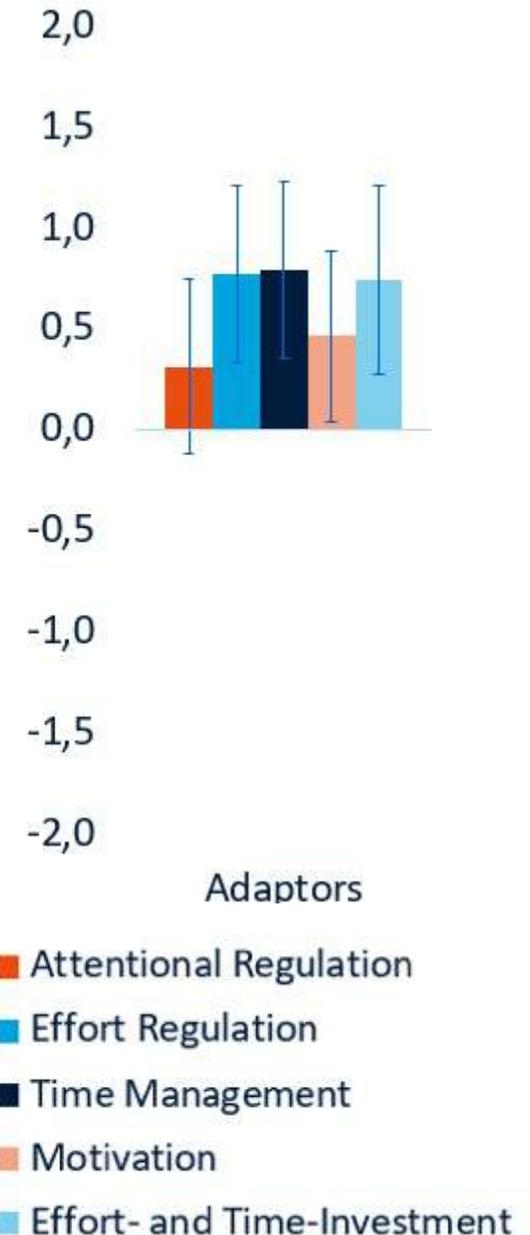

The Surrenderers

*My **motivation** significantly **decreased**. I am also **studying way less** than I would usually do. Though I never missed any activities before the COVID-situation, now I **no longer follow my timetable** and leave the lectures for later.*

The Adapters

*I really **loved** the fact that all the **lectures were recorded**. I think it should be like that all the time. Because of this, I was able to skip a lecture and watch it later (at a later time when I was **more productive**). In this period, I have learned how to **manage my time very well**. I really like online education overall.*

Wat kunnen we hiervan leren?

1. Wees bewust over **verschillen** tussen studenten
2. Maak colleges online **beschikbaar**
Ondersteun zelfgestuurd leren door prompts en/of oefentoetsen ervoor of erna
3. **Ondersteun regulatie** van effort en concentratie
4. **Ondersteun samenwerking** online en offline
Om gevoelens van isolatie te voorkomen
5. Bespreek **verwachtingen** met studenten

Hoe kunnen we studenten ondersteunen
in zelfgestuurd leren?

De 'Study Smart' aanpak

Bewustzijn

Oefening

Reflectie

Zeven tips

1. Zorg voor een leerstrategie programma **voor alle studenten**
2. Implementeer het programma zo **vroeg** mogelijk in het curriculum
3. Laat studenten **van elkaar leren**
4. Verwacht **weerstand**
5. Gebruik veel concrete **voorbeelden** en koppel deze aan wetenschappelijk bewijs
6. Verandering kost **tijd**: Organiseer follow-ups en intervisie
7. **Practice what you preach**: implementeer principes van effectief leren in je eigen onderwijs
