## Ensure Integrity of Online Assessments

### About RPNOW

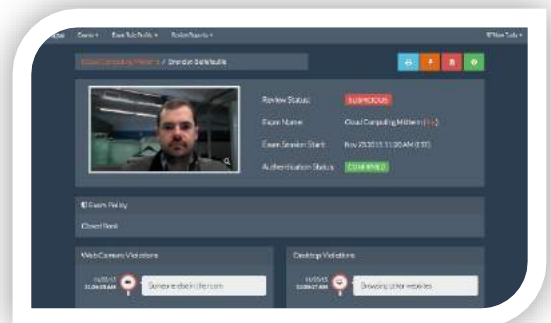

RPNOW is an on-demand, cloud-hosted SaaS solution for exam proctoring that offers all the benefits of secure, fully-proctored testing in remote learning environments – but without the costs and inconveniences associated with test centers or scheduling live proctored test appointments. Using a standard computer webcam with an internet connection, anyone can take a proctored exam through their LMS – anytime, anywhere. Institutions can offer exams when it's convenient for them and their students – with full confidence that test takers are doing their own work without outside help.

### RPNOW Features

- On-demand proctoring
- Student identity verification
- Configurable locked down browser and electronic security
- Flat exam fee
- Works on slower internet speeds
- LMS integration via LTI app
- Third party integration support
- Proctored exam result dashboard
- Exams reviewed by certified proctors
- Furnish videos of proctored exams
- Worldwide support 24 x 7 x 365
- Live chat service
- Professional Services

Effortless exam registration for faculty/admin

Proctored exam results with flagged violations in LMS

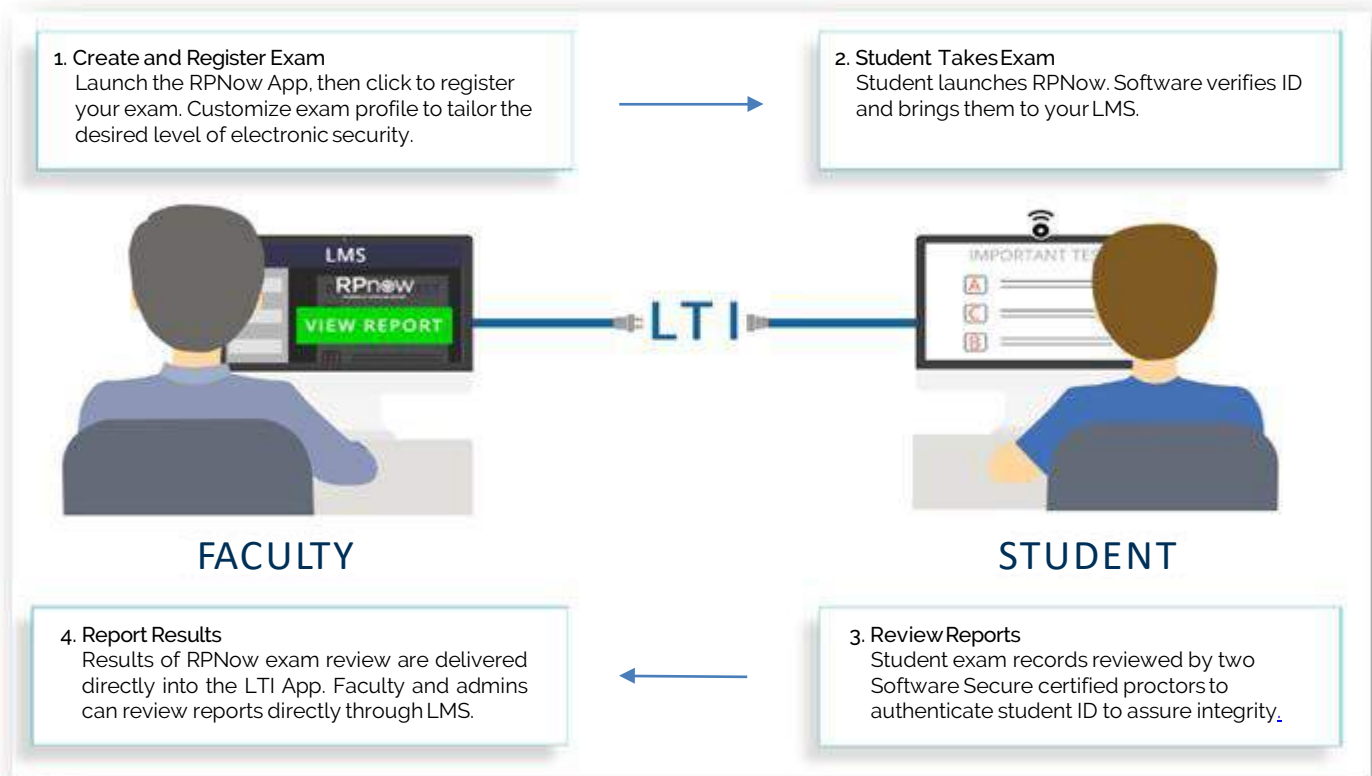

## “ University of Alaska-Anchorage

Given the option, **80%** of students **choose RPNow** due to its on-demand convenience. It's been an extremely helpful system, making our courses truly online. ”

When integrated with your LMS, **RPNow** takes the pain out of proctored exam administration, and replaces it with efficiency and flexibility. See how it works:

## Vanderbilt University School of Nursing

Reputation and quality have always been important at Vanderbilt University's School of Nursing (VUSN). So when it became apparent that there were integrity issues with remote testing in its online nursing program, VUSN set out to find a test proctoring solution that would protect exam integrity, increase security and meet authentication criteria required by the Department of Education. In order to get it right, the VUSN's administration and instructional technology teams worked together to ensure they identified a solution that would benefit faculty, students, and the program overall.
